

U.S. Maritime Solutions Inc.

4602 SE Boatyard Ave. Stuart, FL 34997
781-267-6904

CAPABILITY STATEMENT

UEI D1NCR88CPBZ8 | CAGE 9YDL0

Marine repair, welding, fabrication, mechanical service, and inspection support for government and commercial vessels. Practical shipboard experience informs project planning, field execution, testing, and documentation.

CORE CAPABILITIES

Marine repair & maintenance

Vessel systems, deck machinery, seawater systems, tanks, valves, piping, and auxiliary equipment.

Welding & fabrication

Steel and aluminum structural repairs, plate renewal, hatches, foundations, and shipboard hot-work support.

Mechanical & propulsion

Engine and pump work, shafting, couplings, alignment, component removal, rigging, and installation.

Inspection & testing

Infrared thermography, ultrasonic gauging, pull testing, gauge calibration, and operational testing.

Electrical & technical support

Troubleshooting, electronics installation, temporary engineering support, and preventative maintenance.

PROJECT APPROACH

Scope review and work planning. Safety and hot-work coordination. Condition-found reporting. Inspection and test records. Clear communication through project closeout.
